Genie

Genie is the Databricks AI experience for users. It gives every user in your organization a single place to ask data questions in natural language, explore AI/BI dashboards, and run Databricks Apps. Every answer is grounded in your organization's data and governed through Unity Catalog. The Genie products are part of Databricks AI assistive features, the built-in tools that help everyone in your organization work with data and AI.

The Genie family of AI experiences is built on the same governed data foundation:

- **Genie One:** A simplified interface for business users to discover and interact with data assets.
- **Genie Agents:** Domain-specific environments where data teams configure trusted data, metrics, and business rules that power Genie One answers.
- **Genie Code:** The AI coding and data assistant for developers and technical practitioners inside the Databricks workspace.

Genie One

Use Genie One

Navigate Genie One, browse assets, and interact with your data.

Chat in Genie One

Ask data questions in natural language and get answers grounded in your organization's data.

Account-level Genie One

Discover and interact with shared assets across all workspaces in your account from a single entry point.

Genie mobile

Ask Genie

Use Genie on mobile

Access Genie One from iOS and Android devices to ask data questions, view dashboards, and run Databricks Apps.

Genie Code

Genie Code

Learn about Genie Code capabilities across notebooks, pipelines, dashboards, and more.

Use Genie Code

Chat with Genie Code, get inline suggestions, and run agentic tasks in your workspace.

Add custom instructions

Customize Genie Code behavior with workspace-level and personal instructions.

Convert SQL with Genie Migrate

Use Genie Migrate to convert SQL from other data warehouses to Databricks SQL or Databricks notebooks with Genie Code.

Genie Agents

Genie Agents

Learn how Genie Agents work and how to set one up.

Create and manage a Genie Agent

Configure datasets, sample queries, and instructions to create a trusted data environment for business users.

Tune Genie Agent quality

Add metrics, business rules, and verified answers to improve Genie One response quality.

Ask Genie

Manage Genie budgets

Starting July 8, 2026 at 00:00 UTC, Genie Code is billed following a pay-as-you-go pricing model that includes a per-user free monthly allowance. Account admins can manage budgets and cost controls for Genie. For more details on pricing, see Databricks pricing .

Genie One and Genie Agents usage by users is free through January 31, 2027. Service principals are excluded from the promotion, and their usage is billed.
